## EXPERIENCE

### Mobile Application Developer

2025

Kaymn Company

- Developed **Lirati**, a digital financial-transfers app covering sending, receiving and balance management.
- Implemented secure authentication, transaction workflows and real-time updates.
- Collaborated with backend teams to meet financial-security standards.
- Deployed the app on the Apple App Store and Google Play ([lirati.app/invite](#)).

### Full-Stack Developer (Angular & Laravel)

2024

Lebanese company · Remote training

- Delivered 3 production-ready projects in a 3-month intensive: a medical system (Angular + Laravel API), a restaurant platform with real-time order tracking, and an end-to-end encrypted chat app (Laravel Sockets).
- Built high-performance REST APIs, optimized SQL queries and integrated JWT authentication.

### Frontend Developer (React.js)

2024

Turkish company · Remote project

- Implemented responsive UIs with React Hooks and Redux state management.
- Integrated GraphQL APIs together with backend teams.

### Python Developer · Cybersecurity & AI tools

2023 – 2024

Freelance projects

- Built Python tools that automate vulnerability scanning (SQLi, XSS) for websites.
- Developed custom AI tools for data scraping and predictive analytics.

### Flutter & Laravel Developer

Freelance

- Manhaj Hayah (Flutter, Android)**: free Quran, prayer-times and azkar app with offline Mushaf, tafsir and Qibla; no ads or tracking.
- Quran & Azkar app (Flutter)**: published with 500+ active users; offline Quran reader, prayer times, daily hadiths.
- Children's educational games (Flutter)**: gamified learning with interactive quizzes and rewards.
- E-commerce platform (Laravel)**: 10k+ product listings with Eloquent and payment gateways.

## EDUCATION

### B.Eng. Computer Engineering

University of Aleppo, Syria

Graduated Apr 2023

Specialization: Computer Science

GPA 89.26% (Honors)

## CERTIFICATIONS

### FLUTTER FRAMEWORK

Firebase integration, UI/UX best practices, state management.

### LARAVEL BACKEND

API development, authentication, database optimization.

## SKILLS

### LANGUAGES

Python (advanced), Dart, JavaScript, PHP, SQL

### FRAMEWORKS

Flutter, Laravel, Angular, React, Redux

### AI & SECURITY

Penetration testing (OWASP), AI model prototyping

### TOOLS

Git, Postman, Docker, Figma
